

FlexMLS Customizable Menu Now Active

As of June 20 you have access to a new, easy to use menu in Flexmls. The new design provides a modern look, and allows one-click access to your favorite menu items.

Initially, the new menu will be optional, so you can choose to turn it on or choose to continue using the old menu. After 30 days, the new menu will no longer be optional; all users will be moved over to the new menu.

Turn on the New Menu

On June 20, you will receive an invitation to turn the new menu on when you login to Flexmls. If you don't turn it on immediately, you will be able to click the Use the Customizable Menu button to turn it on. You can also click the "What is this?" link to access more information about the custom menu before you decide to turn it on.
