

# HOW TO PRINT LISTING INPUT FORMS FROM FLEXMLS

The following forms will be removed from zipForm: Residential Input Form, Vacant Land Input Form, Commercial/Industry Input Form, Fractional/Timeshare Input Form, Multi-Family Input Form, and Rental Input Form.

Since changes and additions to the MLS have been needed on an ongoing basis, zipForm changes could not be made quickly enough to keep current.

We are pleased that completely up-to-date listing input forms can be printed directly from Flexmls.

To do so,

1. Log in to Flexmls
2. Click on Menu

3. Type Input in Search field

4. Click on Input Forms

5. Choose the form you want to print and click Print. Or click Settings and make changes to the way the form prints.

## Printable Listing Input Forms

**Choose a property type:**

<b>Residential</b>
Rental
Business Opp
Commercial/Industry
Multi-Family
Vacant Land
Fractional/Timeshare

- Print possible values for fields with lists
